By creating an account you agree to the [Terms of Service](#). For more information about GitHub's

b) Creating Repository :

Step 1 : Click on + to create an repository.

Step 2 : Select new repository

Step 3 : Insert a name to your repository.

- **Description:** It is optional, so if you want to describe something about your repository then fill the description field with necessary information

- **Private:** If you want no one can access your repository then click on private button.
- **Public:** If you want other people can access your repository then click on public button.

Step 4 : click on create repository button then your repository will be created.

Create a New Repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner * Repository name *

ujjval-jain-25 / IT-PRACTICAL

Great repository names are short and memorable. Need inspiration? How about stunning-octo-couscous?

Description (optional)

☒ Public
Anyone on the internet can see this repository. You choose who can commit.

☐ Private
You choose who can see and commit to this repository.

Initialize this repository with:
Skip this step if you're importing an existing repository.

☒ Add a README file
This is where you can write a long description for your project. [Learn more.](#)

☐ Add .gitignore
Choose which files not to track from a list of templates. [Learn more.](#)

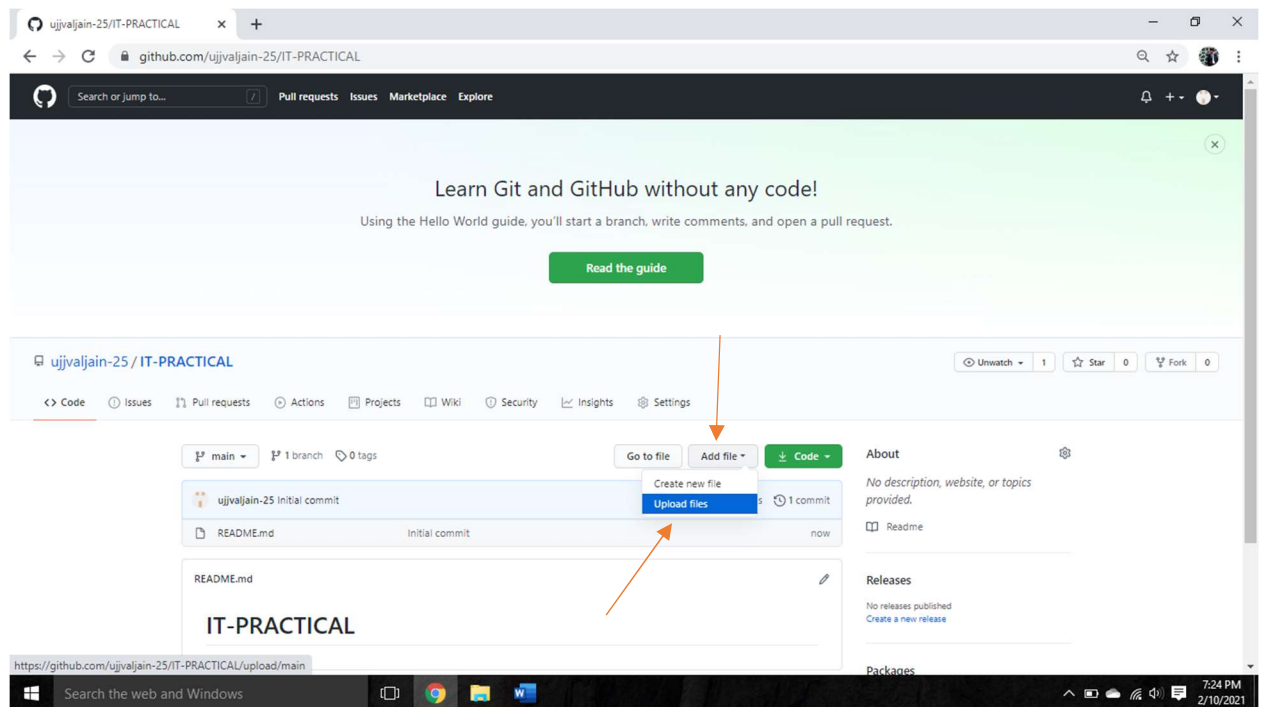

☐ Choose a license
A license tells others what they can and can't do with your code. [Learn more.](#)

This will set `main` as the default branch. Change the default name in your settings.

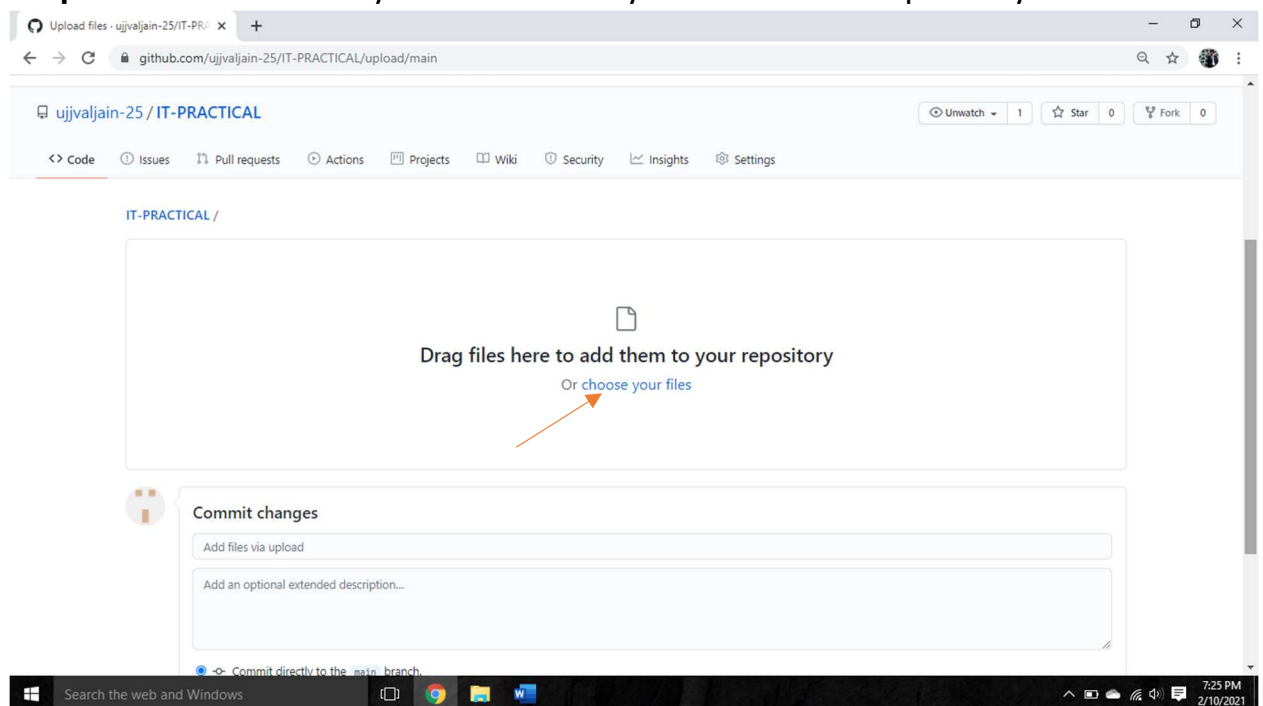

Create repository

c) **Cloning repository :**

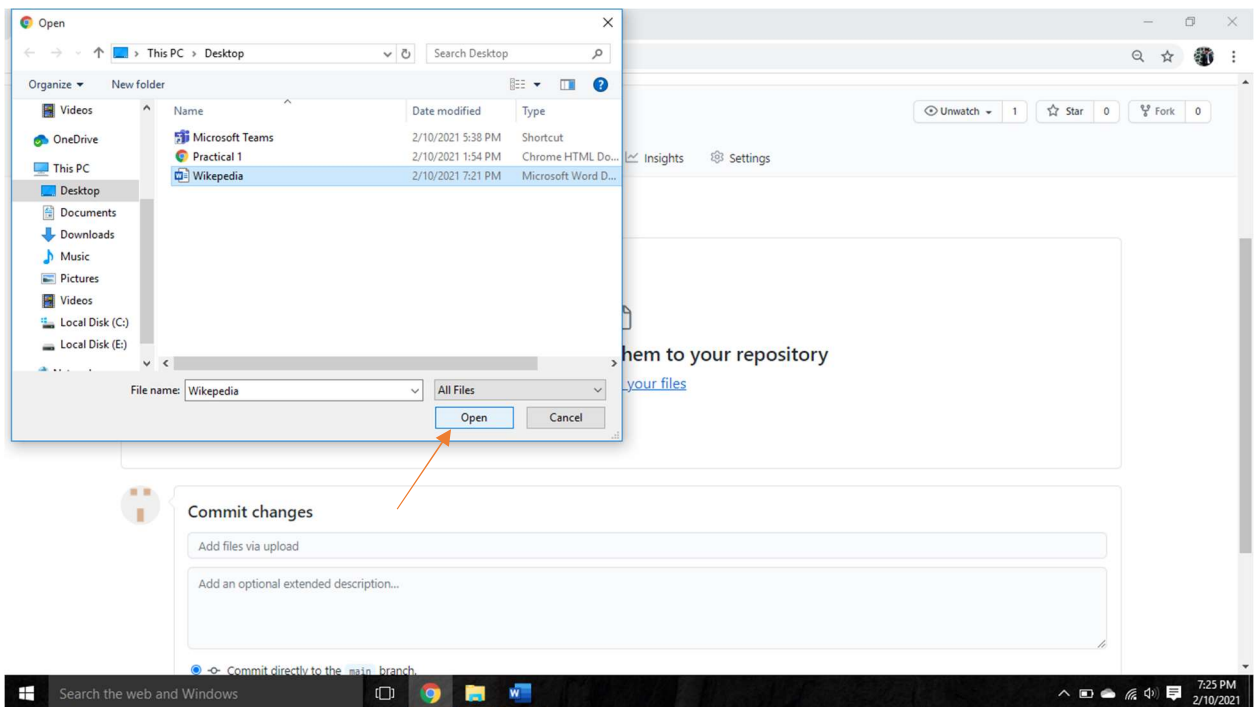

Step 1 : click on add file then select upload files.

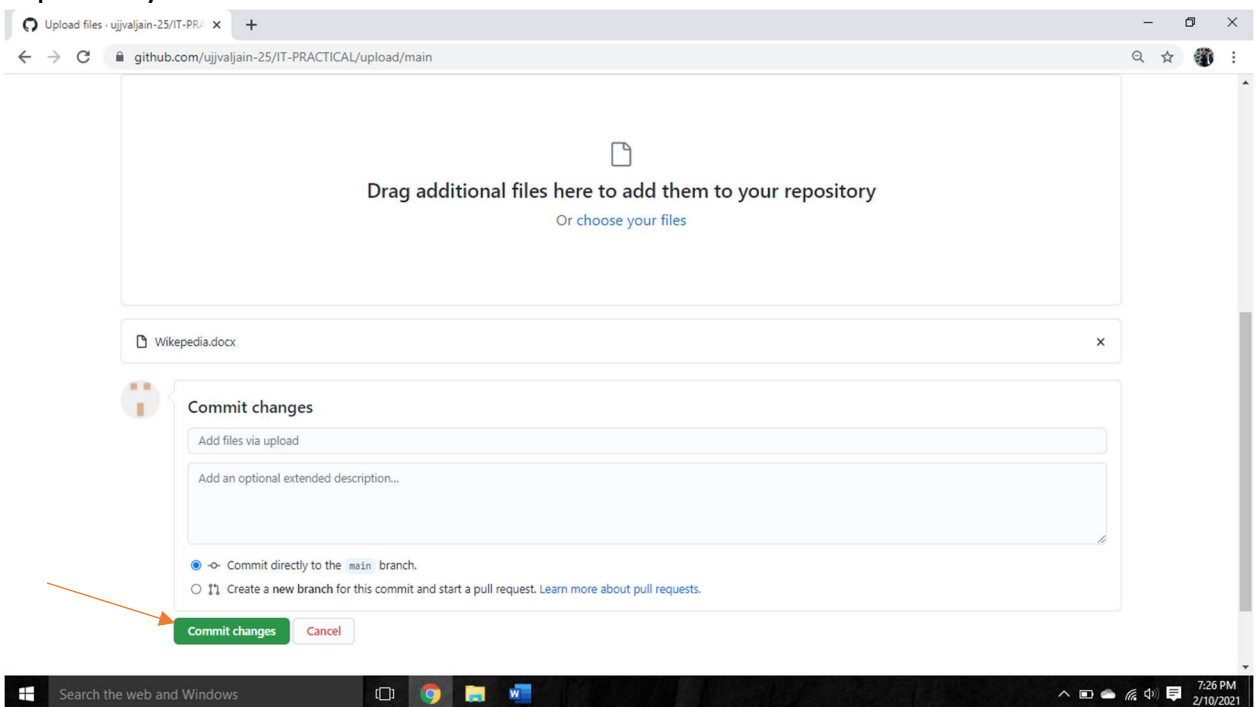

Step 2 : click on choose your files to add your files to the repository.

Step 3 : select your file and then click on open to add your file.

Step 4 : click on commit changes then your file will get added to your repository.

Step 5 : click on the code button to get your repository link and copy the link
To share your repository.
